

> Smart Signs Solutions

Hospitable. Personal. Efficient.

smartsigns

Introduction

> Smart Signs Solutions is a young and innovative international organisation with an excellent track record. Our team comprises technical innovators with a clear focus on the human factor. This means that we use innovative technology to develop user-friendly, practical applications. Our focus is on personalised, dynamic information

systems within buildings. Intended as both a management tool for building managers and a service to users. Our aim: to contribute to a more efficient use of working space and a friendlier environment for users.

Our Origins

> Smart Signs Solutions is a spin-off of the Smart Surroundings research project conducted at the University of Twente. The organisation was founded in 2008 by Dr Maria Lijding with the aim of further marketing the concept of personal dynamic signage in larger buildings.

From our offices at the Business & Sciencepark in Enschede, we work continuously on the further development of intelligent systems. We give more tangible substance to the realisation of smart, efficient buildings.

Partners

> Smart Signs Solutions is a member of an international network of organisations that promote the practical application of technical innovations in Europe. In addition, we regularly cooperate with governments, leading companies and research institutes, as well as with user organisations.

Intelligent Information Concepts

> Smart Signs Solutions believes that people can experience hospitality and professionalism without this placing additional pressure on your staff. This can be achieved using 'smart' technologies. Our vision: to provide businesses and their staff with relevant, up-to-date information whenever and wherever they need it.

All our concepts have been developed in co-creation with customers at all levels; from managers and ICT workers to flex workers, nurses and visitors. As a result, besides being smart, the concepts are also very user friendly.

Insight and Overview

> Each concept provides a complete and innovative information system, consisting of various 'smart' components that cooperate perfectly. You and your staff will consequently have access to relevant, up-to-date information whenever and wherever you need it. Visitors will be able to easily find their way to their appointment. Flex workers will be able to see where a suitable workplace is available as soon as they enter the building. The dashboard and our reports will provide your facility manager with insight into both historical and current occupancy rates of the various rooms. In short, Smart Signs Solutions creates insight and overview, opening the door to the further professionalisation of your organisation.

How will it benefit your organisation?

- > Efficiency in terms of time and space
- > Up-to-date information, any time, anywhere
- > Clear analyses and comprehensible reports
- > Higher customer and employee satisfaction rates
- > User-friendly management instrument
- > Hospitable, professional image
- > Operating cost savings within reach
